Bob Weppler Retires

Congratulations to Journeyman Lineman Bob Weppler on his 2nd retirement! Bob originally retired from GRICUA on

January 2, 2019, but he came back to work for GRICUA as a Subject Matter Expert for another 2 years. This time he plans to stay away. Congrats Bob!!

GRICUA's Plan to Resolve Past Due Balances

GRICUA has been actively in contact with its customers advising them on their balances and working payment arrangements for those that have fallen behind due to COVID. GRICUA will continue to work with its customers to develop a payment plan to avoid disconnecting the customer's service once the Executive Orders are lifted. GRICUA would seek to recover the past due amounts over a period of 6-12 months, depending on each circumstance. For some customers, GRICUA may require or they may elect to go onto GRICUA's Pre-Paid Metering Program (PPM Program). A customer on the PPM Program would have a portion of the amount paid go towards the past due amount, while the rest would go toward the customers current electricity usage. The PPM Program is a pay-as-you-go energy solution. The customer chooses when, where and how often to pay for the energy to be used - pre-paying for their electricity. It is similar to putting gas in your car. Below are some examples of how past due amounts could be recovered.

- **Example 1**, a customer has a \$300 past due balance. The customer requests to pay the balance over 2 months. Therefore, in addition to their normal monthly payment, they would make additional monthly payments of \$150 for the next two months.
- **Example 2**, a customer has a past due balance of \$200. The customer goes on the PPM Program.
 - The customer makes a payment of \$100, with \$50 going towards the past due amount and \$50 available for current electricity usage. The new past due balance would be \$150.
 - The customer then makes a payment of \$150 dollars, with \$75 going towards the past due amount and \$75 available for current electricity usage. The new past due balance would be \$75.
 - The customer then makes a payment of \$150 dollars, with \$75 going towards the past due amount and \$75 available for current electricity usage. The new past due balance would be \$0. Going forward 100% of the customer's payment would be available for current electricity usage.
