

# GILA RIVER INDIAN COMMUNITY UTILITY AUTHORITY

## ELECTRIC RATES

Schedule No. Rider-801

Revision No. 0

**FROZEN Effective Date: April 1, 2021**

Originally Effective Date: March 1, 2009

### Conjunctive Billing Rider

Gila River Indian Community Utility Authority (GRICUA) commercial customers at a single site whose load requires multiple points of delivery through multiple service entrance sections (SESs) may be metered and conjunctively billed as if from a single meter as specified in this schedule.

Conjunctive Billing is the combining for billing purposes on the appropriate rate, the simultaneous demands and energy of a commercial customer who receives electric service at more than one SES at a single site.

Conjunctive Billing shall be permitted only if conditions 1 through 7 below are all satisfied.

1. The customer's facilities must be located on adjacent and contiguous sites not separated by private or public property or right-of-way and must be operated as one integral unit under the same name and as a part of the same business; and
2. Conjunctive billing may be accomplished by providing electronically totalized demand and energy reads or by means of a physical wire interconnection of metering information with the customer providing conduit between the SESs; and
3. The customer shall provide additional metering space, which meets GRICUA specifications, on the customer's property at no cost to GRICUA; and
4. Customers billing demand as defined in the applicable rate must be greater than 100kW for the meters to be conjunctively billed.
5. If the customer operates an electric generation unit on the premise, conjunctive billing will be permitted when the customer complies with all of GRICUA's requirements for interconnection, pays all costs for any additional special metering required to accommodate such service from conjunctive service sections, and takes service on an applicable rate schedule for interconnected customer owned generation; and
6. GRICUA may charge for the installation of special metering equipment and may charge a monthly amount to be determined based on the costs of operating the metering equipment.
7. Written approval by GRICUA's authorized representative is required before conjunctive billing may be implemented.

This rider shall not apply to residential, lighting, irrigation or pumping customers.
