

GILA RIVER INDIAN COMMUNITY UTILITY AUTHORITY

ELECTRIC RATES

Schedule No. E-62

Revision No. 0

FROZEN Effective Date: July 1, 2021

Original Effective Date: December 31, 2013

SPECIAL AGRICULTURE SERVICE

AVAILABILITY:

In all territory served by GRICUA at all points where facilities of adequate capacity and the required phase and suitable voltage may not be adjacent to the premises served.

APPLICATION:

To electric service supplied at one point of delivery, at a 100 amp service and measured through one meter for the exclusive use of pumping water for the purposes of filling canals which are ultimately used to irrigate fields or for drought wells. This rate is not applicable to breakdown, standby, supplementary, residential, or resale service. This rate supersedes all previous rates.

TYPE OF SERVICE:

Sixty hertz alternating current, three-phase, at GRICUA's standard voltages that are available within the vicinity of customer's premises.

CONDITIONS:

Customers requiring additional interconnection, metering, or other equipment beyond what is necessary for GRICUA to provide basic service applicable under this schedule will be required to pay GRICUA for the costs of such additional equipment. The type of meter is solely determined by GRICUA based on customer usage and type of service. GRICUA may require demand metering for any service.

MINIMUM BILL:

The greater of:

1. The sum of the Monthly Service Charge, the Energy, Delivery and System Charge, the Purchase Power Adjustment charge, and the Billing Demand Charge; or
2. A minimum monthly dollar amount specified in a written Agreement for Electric Service, if any.

Schedule No. E-62

Revision No. 0

FROZEN Effective Date: July 1, 2021

Original Effective Date: December 31, 2013

STANDARD AGRICULTURE SERVICE

DETERMINATION OF BILLING DEMAND IN KW:

The greater of:

1. The metered demand, when applicable, is the maximum fifteen-minute integrated kilowatt demand occurring during the billing cycle, as measured by the meter.
2. The minimum kW specified in the agreement for service or individual customer's contract.
3. 80% of the highest kW measured during the six (6) summer months (May-October) of the 12 months ending with the current month.
4. 50% of the nameplate kW output of the transformers (with power factor assumed to be 1.0) if the transformers are owned and maintained by GRICUA.

ADJUSTMENTS

1. GRICUA may increase or decrease billings under this schedule in proportion to any taxes, fees, or charges levied or imposed by any governmental authority and payable by GRICUA for any services, power, or energy provided under this schedule.
2. If the power factor falls below 95 percent lagging at any metering point during any billing period, GRICUA may:
 - a. Adjust kilowatt-hour and/or kilowatts during this period, for billing purposes, to equal 95 percent of kilovolt-ampere-hours and 95 percent of kilovolt-amperes.
 - b. Require the customer to correct the power factor to an acceptable level.
 - c. Require the customer to be continuously metered with a meter that registers kilovolt-amperes, kilovars, or actual power factor. At GRICUA's discretion, customer may be required to pay all costs associated with additional metering.
 - d. If, at any time, the current in any phase exceeds the average of the currents in the three phases by more than 5 percent, at GRICUA's option, GRICUA may increase the bill for the period during which the imbalance occurs by a percentage equal to the imbalance.
 - e. For customers metered for billing purposes at primary voltage, GRICUA will deduct 1 percent of the demand and energy charges from each billing. Primary voltage is defined as the same voltage found at the low side of the applicable substation transformer, typically 12.47 kV. The deduction does not apply to monthly service charges, facilities charges (where applicable), taxes, penalties, fees, or other adjustments.
 - f. If wholesale energy prices to GRICUA increase or decrease, such increase or decrease will be passed through directly to customers.

STANDARD AGRICULTURE SERVICE

RULES AND REGULATIONS:

Service under this schedule is provided in accordance with the Rules & Regulations for Service established by the Gila River Indian Community Utility Authority.

GILA RIVER INDIAN COMMUNITY UTILITY AUTHORITY

ELECTRIC RATES

Schedule No. E-62

Revision No. 0

FROZEN Effective Date: July 1, 2021

Original Effective Date: December 31, 2013

STANDARD AGRICULTURE SERVICE

MONTHLY RATE:

The monthly schedule for this class of service shall consist of a summation of the following costs based on usage.

	<u>Summerⁱ</u>	<u>Winterⁱⁱ</u>
A. Monthly Service Charge	\$24.87	\$24.87
B. Energy, Delivery, and System Charges per kWh	\$0.989	\$0.989
C. Power Purchase Adjustment Charge per kWh ⁱⁱⁱ	\$0.001	\$0.001
D. Billing Demand Charge per kW	\$3.33	\$3.33

i Summer is defined as May – October billing cycles.

ii Winter is defined as November – April billing cycles.

iii GRICUA may increase or decrease the price of the Purchase Power Adjustment based on changes in the cost of purchased power.
